DETAILED ACTION

Inventorship

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Application/Control Number: 10/693,304

Art Unit: 3747

Claims 1,2 and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by Oda et al (US 6,786,199).

As to Claim 1, Oda et al discloses a method for the controlled switching off of a spark ignition internal combustion engine having at least one combustion chamber 11 formed by a cylinder and a piston 13, and having an associated combustion air intake system having at least one of a throttle valve 3 and a variable gas metering system, the engine being coupled to an engine controller 4, said method comprising: opening the throttle valve 3 at least once during the switching off operation of the engine.

As to Claim 2, Oda et al discloses closing the throttle valve at least once during the switching off operation of the internal combustion engine.

As to Claim 8, Oda et al discloses an engine system for the controlled switching off of a spark ignition internal combustion engine having at least one combustion chamber 11 formed by a cylinder and a piston 13, said system comprising: an air intake system having a throttle valve 3; and an engine controller 4 electronically coupled to the engine and said throttle valve, said controller causing said throttle valve to open at least once during the switching off operation of the engine.

Claims 1 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Ejiri et al (US 4,735,179).

As to Claims 1 and 8, Ejiri et al discloses a method for the controlled switching off of a spark ignition internal combustion engine having at least one combustion chamber formed by a cylinder and a piston, and having an associated combustion air intake system having at least one of a throttle valve 1 and a variable gas metering system, the

engine being coupled to an engine controller 6, said method comprising: opening the

Page 4

throttle valve 1 at least once during the switching off operation of the engine.

Allowable Subject Matter

Claims 3-7 and 9-11 are objected to as being dependent upon a rejected base

claim, but would be allowable if rewritten in independent form including all of the

limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to HYDER ALI whose telephone number is (703) 308-

3949. The examiner can normally be reached on M-F (8:00-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, HENRY YUEN can be reached on (703) 308-1946. The fax phone number

for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
